ABOUT THE FOUNDER

NICHOLAS MOORE

Project Manager + Architectural Designer

Nicholas Moore is a Jamaican-born architectural designer with more than 15 years of experience in architecture and construction. He holds a Bachelor of Architectural Science from Toronto Metropolitan University (formerly Ryerson University) in Ontario, Canada, and has worked with leading firms such as EllisDon, Flynn Industrial, and Sahuri + Partners Architecture. Through this experience, he developed a strong foundation in both design and construction, with a focus on structure, coordination, and professional project execution.

Born in Jamaica, Nicholas understands the reality many in the diaspora face—trying to manage homes and investments from thousands of miles away. That reality became personal when Hurricane Melissa struck in 2025 and he struggled to find someone reliable to check on his own property. It reinforced a problem many Jamaicans abroad know too well: the lack of trustworthy oversight when building or maintaining property back home.

Today, Nicholas is committed to bringing his international experience back to Jamaica to help raise the standard of how homes are designed, built, and managed. His mission is to provide the structure, professionalism, and transparency that diaspora homeowners need to confidently build and invest in Jamaica once again.

For Nicholas, architecture is more than construction—it is an expression of culture, heritage, and identity. His work blends modern design with African-Caribbean influence, guided by the principle of balance and harmony, creating homes that respect the past while serving the needs of the future.

WHY NEKHBET DESIGN

With over 15 years of experience in architecture and construction in Canada and internationally, we understand what it takes to deliver projects the right way. Having worked on residential, commercial and institutional projects across North America and Africa, we bring a disciplined, system-driven approach to every project in Jamaica. Nekhbet Design Service was started to help Jamaicans abroad build with confidence - knowing their home is in capable, professional hands.

OUR PHILOSOPHY

We are guided by the philosophy of **Sankofa**, which inspires us to draw from the wisdom of our ancestors' achievements. We strive to understand their thought processes and belief systems, which shaped traditional architectural and engineering innovations across the continent and beyond. By firmly grasping our past, we strengthen our cultural identity, fostering a balance and harmony necessary for focused for modern comfort and meaningful diaspora living.

This philosophy aligns with the principles of **Ma'at,** which emphasize truth, justice, harmony, balance, order, propriety, and reciprocity. Our goal is to embody these ideals within ourselves, our environment, and our past and present. Architecturally, this translates into creating designs that harmoniously balance the past and present while respecting the natural world that promotes sustainability.

Lastly, we believe that Africans, no matter where they are globally, have more in common than differences. As such, our designs are collaborative and influenced by multiple continental cultural elements, evoking nostalgia for former golden ages and embodying the philosophy of **Ubuntu.**

PROJECTS

Ma’at Residence

This home is a modern masterpiece—a captivating blend of sleek contemporary design, luxury, and comfort. Drawing inspiration from traditional Akan dwellings, this residence has been refined and modernized, with additional influences from Khametic and BaKuba cultural aesthetics. The result is a harmonious fusion of cultural richness and modern architectural sophistication, where every element is thoughtfully designed to honour heritage while embracing contemporary living.

Designed for seamless indoor-outdoor living, this home blends open interiors with easy access to outdoor spaces, making it ideal for entertaining guests or hosting events. Its proximity to nearby amenities adds to its appeal, offering a perfect balance of luxury and practicality.

PROJECTS

Ohemaa Merline Residence

Tranquility and simplicity define this meticulously refined modern home, where nature and self-sufficiency are at the heart of the design. Featuring warm, organic natural materials juxtaposed with sleek, polished contemporary lines, this residence evokes a sense of balance and serenity. Its striking stone façade draws inspiration from Akan, Khametic, and Great Zimbabwe cultural influences, resulting in a harmonious blend of natural beauty and modern functionality.personal and expressive of cultural legacy.

This design masterfully harmonizes culture, tradition and modern innovation to create a home that seamlessly interacts with nature while offering privacy and independence. It strikes an intricate balance between heritage inspired details and contemporary elements, resulting in a space that celebrates cultural wealth and foster a deep connection with he natural environment. Enhanced by fresh air circulation and thoughtful layouts, this home provides the perfect sanctuary for relaxation, leisure and refined living in harmony with the outdoors.

PROJECTS

Ikenga Residence

This home draws inspiration from both Khametic and Igbo design traditions, weaving cultural symbolism into a contemporary architectural expression. Rooted in Khametic principles of harmony and balance, the design emphasizes order and connectivity, while Igbo influences bring a sense of community, openness, and respect for natural surroundings. Together, these traditions shape a home that feels deeply connected to heritage yet speaks to modern living.

Designed to encourage interaction with the outdoors, the home features expansive openings, natural ventilation, and seamless transitions between interior and exterior spaces. While grounded in cultural influence, it is fully equipped with modern amenities that support comfort and sustainability. The result is a residence that honors ancestral wisdom while providing a forward-looking lifestyle — a space that embodies identity, community, and contemporary convenience.

RENOVATIONS AND CONSTRUCTION

TORONTO RESIDENCE

The homeowners envisioned a basement renovation that combined modern efficiency with cultural depth—a space designed for energy savings, a clean contemporary look, and a subtle infusion of African heritage. Our approach centered on the kitchen countertop as the focal point and cultural touchstone. The stained butcher block symbolizes the **waters of Nun**, grounding the design in creation and renewal. Overhead, the lighting represents **Kheper-Ra**, the rising sun, while every meal prepared and shared upon the counter embodies the concept of **perpetual life**. This quiet layering of meaning ensures that the African influence remains refined and profound, revealed only through thoughtful explanation.

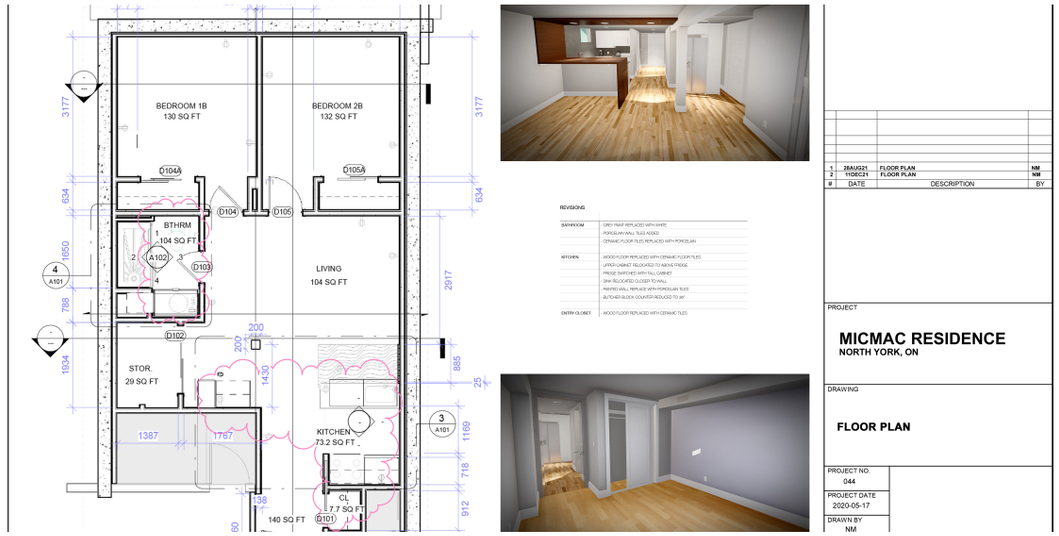

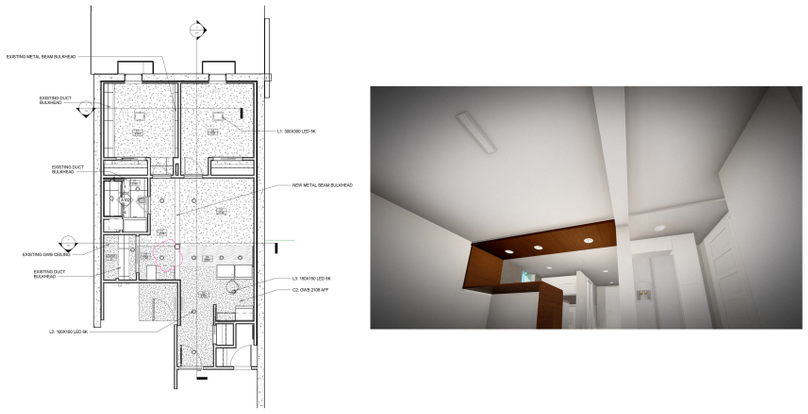

ARCHITECTURAL DRAWINGS

PLAN FOR SUCCESS

Having an architectural design in place before building or renovating is essential because it provides a clear roadmap for turning ideas into reality. A well-prepared design not only ensures that the project is functional, structurally sound, and aesthetically pleasing, but it also helps to avoid costly mistakes, delays, and unnecessary changes during construction. Architects bring professional knowledge of building codes, materials, and spatial planning, which ensures the project meets safety standards and maximizes efficiency. Moreover, an architectural plan helps homeowners visualize the final outcome, make informed decisions, and communicate effectively with contractors. Ultimately, it is an investment that safeguards both the quality and value of the project.

CULTURAL PROJECTS

CONCEPTS UNDER DEVELOPMENT

The following are conceptual designs currently being developed for Kumasi, Ghana. These proposals seek to merge contemporary architectural practices with cultural traditions, highlighting the shared values and similarities across diverse cultures. With continued client collaboration, each design will be refined to address specific needs while standing as a lasting expression of cultural identity and cooperation in architectural design.

Ubuntu Mixed-Use Residence | Influenced by Akan and Zulu cultures

Public Facility | Influenced by Akan and Basotho cultures

Sepaase Townhouses | Influenced by Akan and Khanetic cultures

Sobek Apartment | Influenced by Khametic and Dogon cultures

DIASOPRA SERVICES

Remote Project Management

For clients living abroad, we provide trusted on-the-ground project management that ensures your home is handled professionally, even when you are not physically present.

This service is designed to remove uncertainty, miscommunication, and risk for overseas homeowners.

Includes:

- On-site coordination and supervision
- Clear scopes and staged planning
- Regular photo and video progress updates
- Builder and trade accountability
- Transparent communication throughout the project

You remain informed and in control, no matter where you live.

TESTIMONIALS

LISA HAMBLIN-CROSS

“I had Nic and his crew come in whilst I was away on holiday in England and take out the old flooring, prep the area and lay the new vinyl flooring. I bought the materials and they quoted me for the labour of laying it. They were extremely respectful of my property and timeline. I'm so happy with the results. They gave me a very competitive quote. They got it done within the time and quote agreed. I would thoroughly recommend using this company.”

CARON HUDSON

“Nick installed my security camera at my house in Calgary, and he did such a amazing job, I was extremely happy with the job, and how neat and professional he was. We have a few technical issues along the way and he just kept on trying new things to make it work, I appreciate his dedication to make me happy and he did pull it off I’m extremely happy with the job he done and he’s such a perfectionist.”

KYEI BOATENG

““I’m a builder in Accra Ghana and have been building for almost three years now. While he was in Ghana, I was introduced to Nana to help develop a website for my business and was surprised to find out that he also prepares architectural drawings so I asked him to help me with also with document control to aide me in advertising and progress reporting documents for prospective and existing clients the way they do it aboard. He continued to assisted me from Toronto even while I am in Ghana. I wish him all the best as he brings his expertise back to Jamaica and look forward to visiting Nana in Jamaica in the near future.”

ANTHONY FOUL

“My wife and I hired Nicholas and his company to renovate a room in our basement about 3 years ago and at first we were annoyed that he insisted on preparing architectural drawings for just one room. We were more that surprise at the end result so we had him renovate the entire basement. Although we could not read the architectural drawings were more than please to see that what he had as 3D drawings was what we got as a end result. We definitely recommend Nicholas in Toronto and Jamaica. Bless up.”
